

## Unit 201 (CH11) Style and Finish Hair Activity 3

### Electricity at Work Regulations research activity

Carry out research into the Electricity at Work Regulations 1989 using the Internet or textbooks then answer the questions below. You should use the bibliography box at the end of this activity sheet to make a note of the website addresses and books you have used as you work through the task.

- 1 State your responsibilities under the current Electricity at Work Regulations 1989. Write a definition of your responsibility under this legislation below.

.....

.....

.....

.....

- 2 What does the Electricity at Work Regulations 1989 state that the salon owner or working environment should do?

.....

.....

.....

.....

- 3 Who would you refer faulty equipment to in your salon or working environment?

.....

.....

- 4 Complete the chart below by adding six types of equipment that would need to be checked annually under the Electricity at Work Regulations 1989 and the safety checks it would be necessary to carry out (identifying potential faults).

The first row of the table has already been completed, as an example.

Equipment	Safety checks required (potential faults)
<i>Tongs</i>	<i>Thermostat working correctly Loose wires Plugs secure Indicator lights working</i>

**Bibliography** (make a note of website addresses and the books you have used to complete this task; you may need to add more sheets of paper)
